Re: Coakley Landfill

Dear Sir:

I have read as much of the information available concerning the Coakley Landfill, as well as looked into all the available documentation as to our waste management at our company. I cannot find any relationship between the non-hazardous, cardboard type rubbish produced by our company, and the list of indicator compounds listed in your proposed plan.

I am therefore respectfully requesting that the EPA strike our company from it's list of potentially responsible parties. If it is not possible for the EPA to strike our company from this list based upon facts known to you, that I am not ware of, I request that I be provided with a copy of this information.

Sincerely,

Richard Tara
